

# Logging and IT Asset Management

## When thinking about PC and Information Management

Do You Have These **Concerns?**

As the number of PCs increases **manual management** is becoming more and more difficult.

How to manage and control information of **teleworking employees**.

The employee time tracking system **does not provide an accurate picture** of work being done.

**IT asset and log management** are not being done properly.

Watch can solve these issues ! >>>>

# Watch's Key Points

POINT  
**01**

Set the necessary collected information by bulk operation.

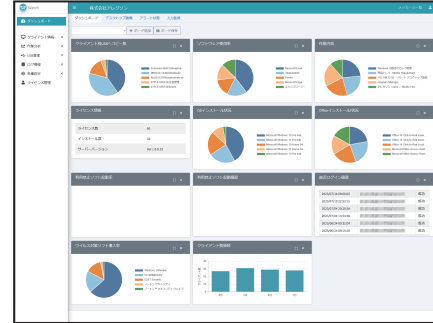

Multiple policies (information collection settings) can be registered, allowing you to set policies according to job positions and organizations.

POINT  
**02**

Simple and easy-to-use management interface.

Viewing settings and logs is a breeze!

## Functionality tailored to your company needs.

### Hardware Asset Management

Obtain and centrally manage PC hardware information (e.g., OS, version, serial number) from the management interface.

### Software Asset Management and Control

Obtain and centrally manage installed software information (e.g., security software, presence of automatic updates) on the management interface, and prohibit high-risk apps.

### File Operation Monitoring

Obtain logs of file creation, deletion, etc. You can also record clipboard copy logs and specific file access.

### USB Drive Monitoring and Control

Obtain usage logs of USB drives. You can also restrict the use of USB drives and WPDs. Logs include manufacturer name and serial number of used USB drives.

### Screen Monitoring

Obtain PC screenshots at regular intervals. Logging data as images allows intuitive understanding of computer usage and work status.

### Web Access Monitoring

Obtain browsing logs from web browsers.

### Usage Time Monitoring

Obtain summaries of usage time on PCs. Logs are obtained for each software used (e.g., web browser, pages viewed, viewing times).

### Report Sending

Send collected logs as daily, weekly, or monthly reports to administrators via email.
