Watch monitors and manages users through the cloud, ensuring that employees and users work securely at home, at the office, outdoors, or anywhere. Watch maximally protects your critical data. At the same time, it can accurately monitor and report on employee performance.

With "Watch", you can:

🔍 **Monitor User Activity**
Gain real-time visibility into user operations across all systems.
⚠ **Take Control of Risky Access to prevent data leaks .**
Prevent potential internal data leaks by restricting or blocking access to risky software, USB devices, or printers.
🚀 **Track Performance & Boost Productivity**
Monitor actual working hours and employee activity to maintain peak performance across your teams.
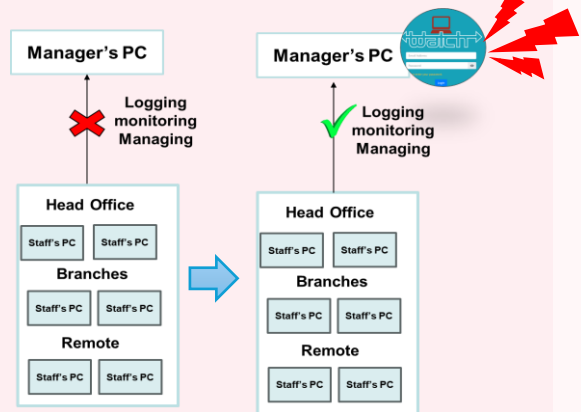

How Watch works?

Users' PCs → cloud serve → Manager PC

Analyze and control access rights to software, and devices, ect.

1 Benefit for CEO to manage company's system:
Manage your PC system more efficiency every where

Manager's PC — Logging monitoring Managing ✖
Manager's PC — Logging monitoring Managing ✔

Head Office — Staff's PC, Staff's PC
Branches — Staff's PC, Staff's PC
Remote — Staff's PC, Staff's PC

2 Help CIO easier to manage hardware system and prevent data leaks.

Hardware Asset Management
Monitor and manage all detailed information of user computers, such as specifications, OS version, etc.,

Screen Monitoring
Automatically capture screenshots every 30 minutes and whenever a user performs restricted access..
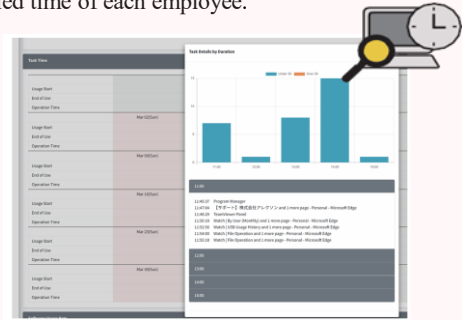

Limit the data leak by manage and control accesses and devices
Display the history and control the connection rights of USB devices, printers or software accesses to prevent data theft or leaks outside.

Browser's history monitoring
Monitor and save the web browsing history of users.

3 Benefit for HR department to track staff's performance
Obtain detailed information about your staff's performance, observe and record the actual working hours of employees or users, allowing managers to track the specific and detailed time of each employee.

4 Give you an overview about PC system and staff by daily, monthly, yearly report sending
Get easy-to-understand server reports and detailed performance reports for each user.

5 You are freely to set different "Policy" for different department within your company. Make the management process becomes super easier!
